

# TECHNICAL SPECIFICATIONS

## Full-Face Wafer/Lug Butterfly Valves: 2"– 12" Series 700 Elastomer Lined Composite

### 1. SCOPE

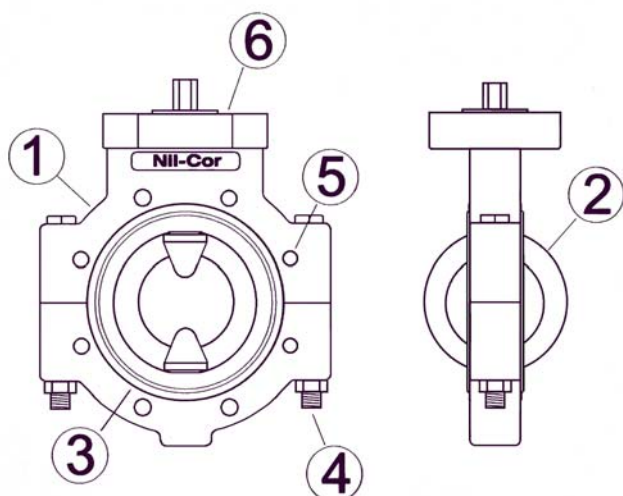

Full-Face Wafer/Lug Butterfly Valves with through-drilled or threaded flange bolt holes for corrosive and/or abrasive chemical services.

### 2. SERVICE RATING

Continuous temperature service from -50 to 250° F. Short-term exposures to 300° F are acceptable.

### 3. MATERIALS OF CONSTRUCTION

- (1) **Body:** Glass fiber reinforced vinyl ester resin
- (2) **Disc:** EPDM/DCI, Hypalon/DCI, Gr. C-2 Titanium, 316 stainless steel
- (3) **Seat:** EPDM, Hypalon, other elastomers upon request
- (4) **Body Bolts:** Zinc-dichromate plated ASTM A193 Gr. B7
- (5) **Flange Connections:** Bolt holes may be through drilled (wafer) or threaded (lug).
- (6) **Actuator Mounting Pad:** Per ISO 5211

### 4. DESIGN

- Body shall have flange clearance holes per ANSI B16.5 CL 150 for alignment or be threaded. Threaded Lug valves are fully rated for end-of-line service.
- Valves are designed for Bi-Directional shutoff at full rated pressure.
- Body shall have burst pressure at least 4x the rated pressure, per ASTM 1173.
- Face-to-face dimensions per MSS SP67 as listed on Page 2.
- Disc shall be a one piece blowout proof design.
- Stem sealing to be provided by mating primary seat/disc spherical surfaces backed up by tortuous locking barbs
- Valve design shall be such that it can be bolted into a standard PTFE-lined steel pipe and the valve disc not interfere with the lining of the pipe.
- Valve disc/seat to provide bubble tight shut off per API 598 and MSS SP61.
- Gear or lever handle shall be available on all sizes.
- Valves shall be capable of on-off actuation or modulating control with pneumatic, electric or hydraulic actuators.

### 5. QUALITY ASSURANCE

- The Manufacturer's facility shall be certified to ISO 9001 or equivalent.
- Each valve shall be pneumatically tested with nitrogen or air at 165 psig with the disc open and both ends blanked for 3 minutes with no evidence of leakage.
- Each valve shall be subjected to a pneumatic seat test at 150 psi with no evidence of leakage.

### 6. PACKING AND SHIPPING

Valves shall be shipped in the closed position. Each valve shall be marked with the manufacturer, size, series, construction materials, serial number, and valve component designation in accordance with MSS SP25.

### 7. AVAILABILITY

Valves meeting this specification are available from:

NOTES:

\*Lined piping which exceeds the liner thickness specification of ASTM F1545 may require spacers to avoid disc interference.

\*\* 12" valve size only, the actuator mounting holes are offset 15° on ISO 5211 F12 bolt circle. (See Above)
